USEC	United States Enrichment Corporation
VOA	Volatile Organic Analysis

EXECUTIVE SUMMARY

Department of Energy Material Storage Area (DMSA) C-333-31 is located in the C-333 Process Building and is bounded by columns E-Ja/3 1-36. It is also identified as Solid Waste Management Unit (SWMU) #287. The area has been used from approximately 1980 to the present for the storage of excess enrichment and maintenance process equipment such as compressors, coolers, roll stands, valves, piping and pumps. Miscellaneous items such as maintenance tools, work platforms, carts, vacuum cleaners and wooden pallets are stored in the area. Approximately thirteen B-25 boxes of miscellaneous scrap metal parts, as well as one for electrical wire and cable, and one for wood and plastic items are also stored in the DMSA. The DMSA covers an area of approximately 16,000 square feet (ft^2), making it one of the largest DMSAs at the plant. It was divided into 33 zones during the characterization process to better define equipment location and facilitate work activities. The DMSA inventory combined with the reusable material has an estimated volume of 40,207 cubic feet (ft^3) and an estimated weight of 784,273 pounds (lbs). The characterization process of this DMSA began August 2001 and was completed September 2002. This DMSA was initially characterized as a Phase 2 DMSA since it was not fully characterized and had the potential for having fissionable material. Although it has now been fully characterized it will remain a Phase 2 DMSA since fissile material is stored in the DMSA (see NCS section).

RCRA/RCRA Mixed

A large volume of Resource Conservation and Recovery Act (RCRA) and RCRA/Mixed wastes was identified in the **DMSA**. The large quantity was circuit boards and fuses removed from equipment. Light bulbs and vacuum tubes were also identified. Oil was removed from numerous pieces of equipment, such as pumps, hydraulic lifts, and roll stands. Mercury from a manometer, solder, a tube of epoxy, transmission fluid, and batteries were also identified in the DMSA. All of these items were properly labeled, packaged, and removed to the C-752-A RCRA permitted storage facility. Gasoline and diesel fuel were identified, packaged, labeled and removed to the C-733 RCRA permitted storage facility. Health Physics surveys and analytical data were used to determine if the wastes were classified as RCRA or RCRA/Mixed.

TSCA PCB/PCB LLW

Two electrical cables and numerous capacitors were identified as Toxic Substances Control Act (TSCA) polychlorinated biphenyl (PCB) or PCB/low level waste (LLW). A Health Physics (HP) survey was performed on each item to determine if it had radiological contamination. This data was used to classify each item as PCB or PCB/LLW. These items were properly labeled, packaged, and transferred to the C-752-A storage facility.

ACM/LLW

Brake pads and insulation from a welding machine, an oven, and a stator were identified as asbestos-containing material (ACM). The materials were abated and transferred to the C-752-A storage facility.

Solid Waste

There were no solid waste items identified in the DMSA.

LLW

All of the equipment and material remaining in the DMSA (other than the Reusable Material) have been classified as LLW. All equipment/items were given bar code identification for future inventory control and equipment location.

NCS

Prior to the initiation of current work activities for the characterization project, many items had been characterized under a previous Nuclear Criticality Safety (NCS) program as fissile and/or classified material. These items were identified as United States Enrichment Corporation (USEC) material/equipment and were removed from the DMSA at that time. Five items identified as fissile material (but not classified) remain in the DMSA. These items are two vacuum cleaners, a piece of monel pipe, a valve test panel, and a mass spectrometer instrument panel. These items are appropriately spaced and managed in a Fissile Control Area (FCA), within the DMSA.

Reusable Material

Compressors and compressor parts (rotors, stators, spiders, shafts, nozzles, fins, wobble feet) and several converter coolers were identified as reusable material. Also identified as reusable were compressors transport carts and an equipment cart. These items will remain in the DMSA until reused.

D&D

There were no items identified for Decontamination and Decommission (D&D) in the DMSA.

IH

All the Industrial Hygiene (**M**) data has been reviewed. All quality control samples were within normal acceptable guidelines. No personnel were exposed to any airborne concentrations above a permissible exposure limit or threshold limit value.

HP

The Health Physics (HP) radiological surveys concluded the highest alpha reading was 37,846 disintegrations per minute (dpm)/100 cm². This reading was taken on a cart. The highest beta/gamma reading was 3,467,374 dpm/100 cm². This reading was taken on ~~an~~ I-beam.

Safety

There were no safety related events during the field activities. All workers had stop work authority to ensure unusual or unexpected events were evaluated before work was allowed to proceed. A safety officer was in attendance during all phases of work to evaluate conditions and provide safety related input to the workers.

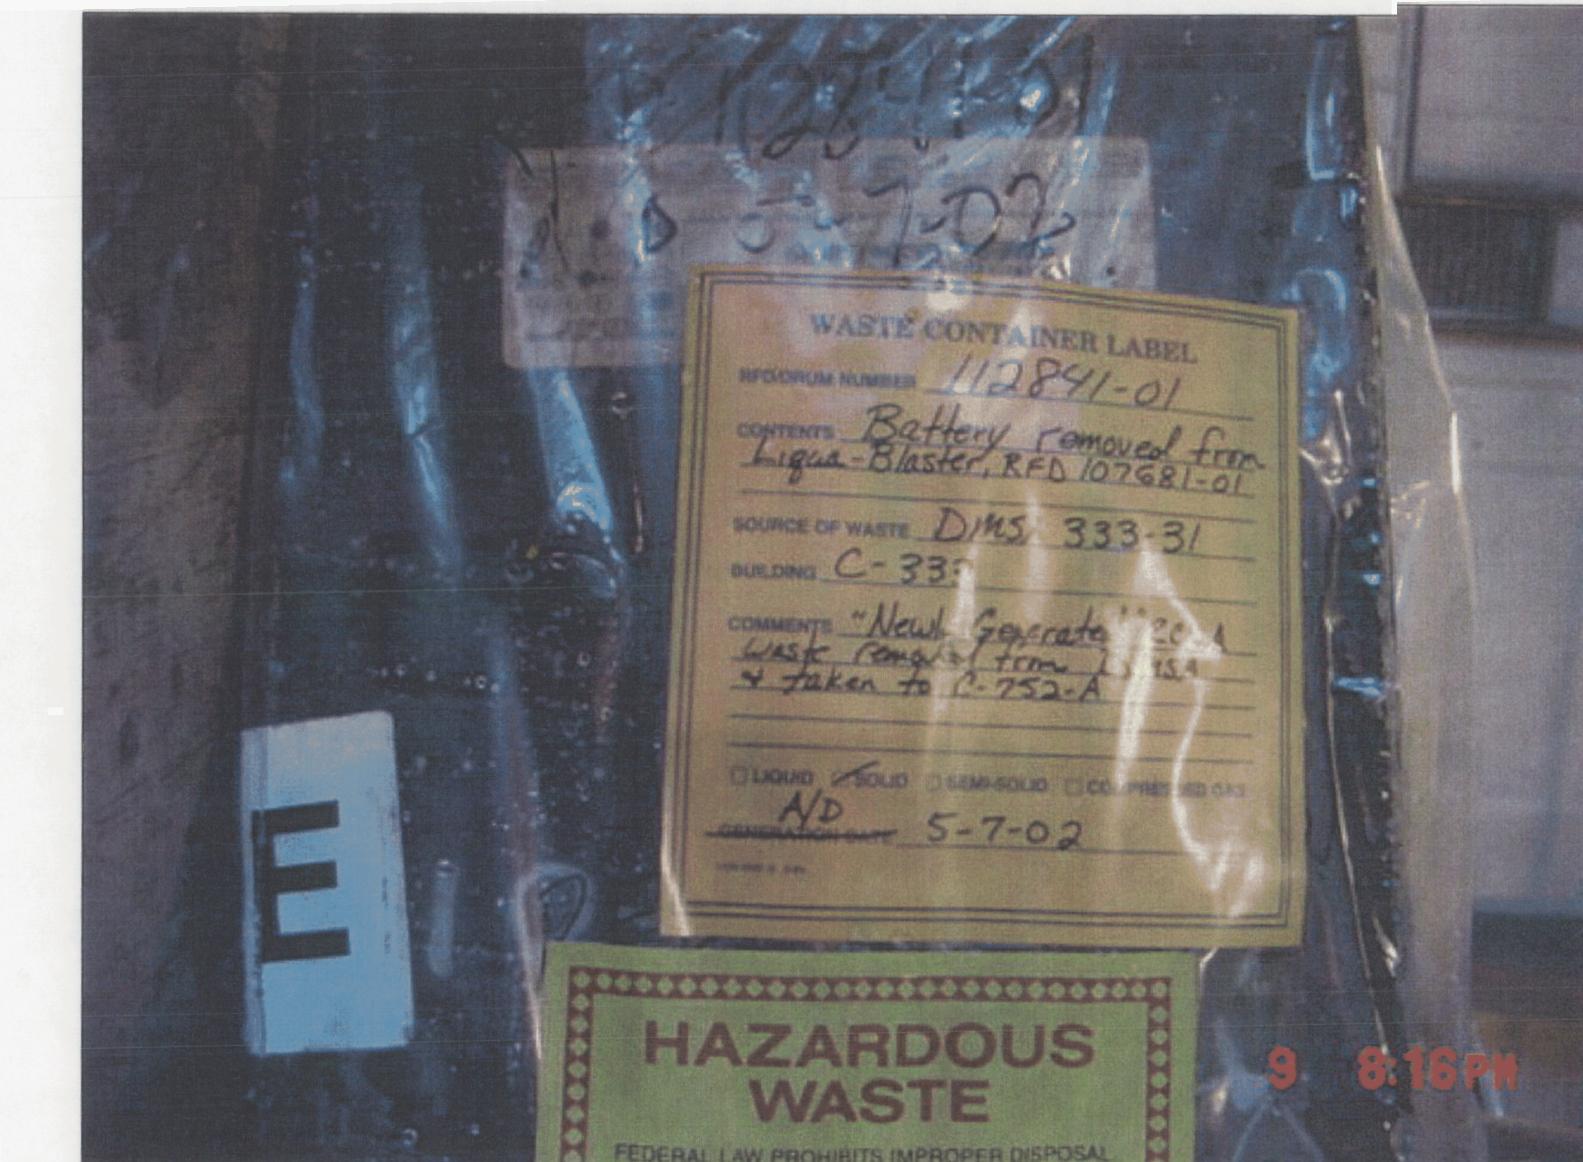

All actions involved in this characterization were documented and have been retained in permanent files. Part of the documentation includes photographs. Several of these photographs are included in this report.

000' Thrust Bearina	E00119	Reusable	Zone 20	DMSA011037	1	4.5	250	No
300' Axial Compressor	E00120	Reusable	Zone 20	DMSAOI11030	1	1,900	32,000	No
300' Compressor Transport Cart	E00121	Reusable	Zone 20	DMSAOI11031	1	531	3.000	No
000' A Section Nozzle	E00122	Reusable	Zone 20	DMSAOI11032	1	910	10,000	No
(100' A Section Nozzle	E00123	Reusable	Zone 20	DMSAOI11033	1	910	10,000	No
(100' Compressor Stub Shaft	E00124	Reusable	Zone 24	DMSAOI11035	1	16	800	No
000' Thrust Bearings and Cart	E00125	Reusable	Zone 16-20	DMSAOI11039	1	22	350	No
(100' Thrust Bearing	E00126	Reusable	Zone 15	DMSA0111042	1	4.5	250	No
000' Axial Compressor	E00127	Reusable	Zone 16	DMSAOI11043	1	1,900	32,000	No
(100' Compressor Transport Cart	E00128	Reusable	Zone 16	DMSA0111044	1	531	3,000	No
8" Water Control Valve	E00129	Reusable	Zone 16	DMSA0111045	1	5	150	No
Stator Aluminum Shroud Section	E00130	Reusable	Zone 16	DMSA0111046	1	25	150	No
000' Aluminum Shroud Section	E00131	Reusable	Zone 16	DMSAOI11047	1	25	150	No
000' Converter Cooler	E00132	Reusable	Zone 16	DMSAOI11048	1	475	14,000	No
"A" End Nozzle for (100' Compressor	E00133	Reusable	Zone 6	DMSA0111049	1	910	10,000	No
Flat Bed Wagon	E00134	Reusable	Zone 6	DMSAOI11051	1	75	700	No
