NOV 14 2002

Ladies and Gentlemen:

Transmitted herewith is one copy of the final National Pollutant Discharge Elimination System permit referenced above.

You are hereby notified that this action of the director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and shall set forth the action complained of and the grounds upon which the appeal is based. It must be filed with the Environmental Review Appeals Commission within thirty (30) days after notice of the director's action. A copy of the appeal must be served on the director of the Ohio Environmental Protection Agency and the Environmental Law Division of the Office of the Attorney General within three days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
236 East Town Street, Room 300  
Columbus, Ohio 43215

Sincerely,

*Patti L. Smith*

NOTICE OF NPDES PERMIT FEE DUE

**INVOICE**

		<b>OFFICE USE ONLY</b>	
		REVENUE ID#: 313377	
		DOCUMENT #: 24651	
		PLACE ID#: 34717	
Entity Name: Bechtel Jacobs Company LLC Portsmouth Gaseous Diffusion Plant		Permit No.: OIO00000*HD Effective Date: December 1, 2002	
Mailing Address: PO Box 900 Piketon, OH 45661			
Facility Location: Bechtel Jacobs Company LLC Portsmouth Gaseous Diffusion Plant 3930 SR 23 South Piketon, OH 45661			
Permit fees for the above facility were computed in accordance with the following information and at rates established in Section 3745.11 of the Ohio Revised Code.			
Outfall Number	Design Flow (GPD)	Rate	Charges
012	372,000	\$ 750.00	\$ 750.00
013	434,000	\$ 750.00	\$ 750.00
015	6,000	\$ 200.00	\$ 200.00
<b>FEE PAYMENT DUE: \$ 1700.00</b>			

Please remit not later than 15 days after the cited effective date of this permit.  
Make check payable to "Treasurer, State of Ohio" and mail it to:

Ohio Environmental Protection Agency  
Lazarus Government Center  
Office of Fiscal Administration  
P. O. Box 1049  
122 South Front Street  
Columbus, OH 43216-1049

Please return this copy with your remittance.

Application No. OH0006092

Issue Date: November 12, 2002

Effective Date: December 1, 2002

Expiration Date: November 30, 2007

Ohio Environmental Protection Agency  
Authorization to Discharge Under the  
National Pollutant Discharge Elimination System

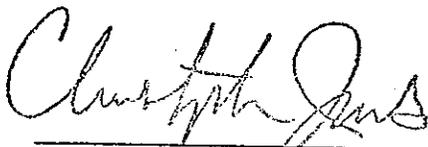

In compliance with the provisions of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et. seq., hereinafter referred to as the "Act"), and the Ohio Water Pollution Control Act (Ohio Revised Code Section 6111),

Bechtel Jacobs Company LLC  
(Former Permit Holder: United States Department of Energy)

is authorized by the Ohio Environmental Protection Agency, hereinafter referred to as "Ohio EPA," to discharge from the authorized outfalls located at United States Department of Energy's operations at the Portsmouth Gaseous Diffusion Plant near Piketon, Ohio, Pike County discharging to Little Beaver Creek, West Ditch, Piketon DOE Tributary and Scioto River in accordance with the conditions specified in Parts I, II, and III of this permit.

This permit is conditioned upon payment of applicable fees as required by Section 3745.11 of the Ohio Revised Code.

This permit and the authorization to discharge shall expire at midnight on the expiration date shown above. In order to receive authorization to discharge beyond the above date of expiration, the permittee shall submit such information and forms as are required by the Ohio EPA no later than 180 days prior to the above date of expiration.

Christopher Jones  
Director

Total Pages: 26

Part I, A. - FINAL EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

1. During the period beginning on the effective and lasting until the expiration date of this permit, the permittee is authorized to discharge in accordance with the following limitations and monitoring requirements from outfall 0100000015. See Part II, OTHER REQUIREMENTS, for locations of effluent sampling.

Table - Final Outfall - 015 - Final

Effluent Characteristic Parameter	Discharge Limitations				Monitoring Requirements			
	Concentration Maximum Minimum	Specified Units	Loading* kg/day	Measuring Frequency	Sampling Type	Monitoring Months		
39180 - Trichloroethylene - ug/l	10	Monthly	Daily	Weekly	Monthly	1/2 Weeks	Grab	All
39516 - PCBS - ug/l	-	Weekly	Monthly	Weekly	Monthly	1/Quarter	Grab	Quarterly
50050 - Flow Rate - MGD	-	Weekly	Monthly	Weekly	Monthly	1/Day	24hr Total	All

Notes for Station Number 01000000015:

\* There shall be no detectable amount of polychlorinated biphenyls. The permittee shall use method 608 as indicated in 40 CFR 136, Appendix A.

- Sampling shall be performed when discharging. If NO DISCHARGE OCCURS DURING THE ENTIRE MONTH, report "AL" in the first column of the first day of the month on the 4500 Form (Monthly Operating Report). A signature is still required.

Part I, A. - FINAL EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

2. During the period beginning on the effective date of this permit and lasting until the expiration date, the permittee is authorized to discharge in accordance with the following limitations and monitoring requirements from outfall 01000000611. See Part II, OTHER REQUIREMENTS, for locations of effluent sampling.

Table - Internal Monitoring Station - 611 - Final

Effluent Characteristic Parameter	Discharge Limitations			Monitoring Requirements		
	Concentration Maximum Minimum	Specified Units Weekly Monthly	Loading* Daily	Measuring Frequency	Sampling Type	Monitoring Months
39180 - Trichloroethylene - ug/l	10	- - 10	- -	1 / 2 Weeks	Grab	All
50050 - Flow Rate - MGD	- -	- -	- -	1/Day	24hr Total	All

Notes for station 01000000611:

- Sampling shall be performed when discharging. If NO DISCHARGE OCCURS DURING THE ENTIRE MONTH, report "AL" in the first column of the first day of the month on the 4500 Form (Monthly Operating Report). A signature is still required.

Part I, A. - FINAL EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

3. During the period beginning on the effective date of this permit and lasting until the expiration date, the permittee is authorized to discharge in accordance with the following limitations and monitoring requirements from outfall 01000000608. See Part II, OTHER REQUIREMENTS, for locations of effluent sampling.

Table - Internal Monitoring Station - 608 - Final

Effluent Characteristic	Discharge Limitations			Monitoring Requirements		
	Concentration Specified	Loading* kg/day	Measuring Frequency	Sampling Type	Monitoring Months	
Parameter	Maximum	Minimum	Weekly	Daily	Weekly	Monthly
00400 - pH - S.U.	-	-	-	-	-	-
34546 - 1,2-trans-Dichloroethylene - ug/l	66	-	-	-	-	-
39180 - Trichloroethylene - ug/l	10	-	-	-	-	-
50050 - Flow Rate - MGD	-	-	-	-	-	-
					1/2 Weeks	24hr Total
					1/2 Weeks	24hr Total
					1/2 Weeks	24hr Total
					1/2 Weeks	24hr Total

Notes for station 01000000608:

- Sampling shall be performed when discharging. If NO DISCHARGE OCCURS DURING THE ENTIRE MONTH, report "AL" in the first column of the first day of the month on the 4500 Form (Monthly Operating Report). A signature is still required.

Part I, A. - FINAL EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

4. During the period beginning on the effective date of this permit and lasting until the expiration date, the permittee is authorized to discharge in accordance with the following limitations and monitoring requirements from outfall 0100000613. See Part II, OTHER REQUIREMENTS, for locations of effluent sampling.

Table - Internal Monitoring Station - 613 - Final

Effluent Characteristic	Discharge Limitations				Monitoring Requirements		
	Parameter	Concentration	Specified Units	Loading* kg/day	Measuring Frequency	Sampling Type	Monitoring Months
00530 - Total Suspended Solids - mg/l	-	-	-	-	1/2 Weeks	Grab	All
50050 - Flow Rate - MGD	-	-	-	-	1/Day	24hr Total Estimate	All
50060 - Chlorine, Total Residual - mg/l	-	-	-	-	1/2 Weeks	Grab	All

Notes for station 0100000613:

- \* Discharges are limited to blowdown from the particulate separator and the occasional discharge of heating water for maintenance activity.
- Sampling shall be performed when discharging. If NO DISCHARGE OCCURS DURING THE ENTIRE MONTH, report "AL" in the first column of the first day of the month on the 4500 Form (Monthly Operating Report). A signature is still required.

Part I, A. - FINAL EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

5. During the period beginning on the effective date of this permit and lasting until the expiration date, the permittee is authorized to discharge in accordance with the following limitations and monitoring requirements from outfall 0100000013. See Part II, OTHER REQUIREMENTS, for locations of effluent sampling.

Table - Final Outfall - 013 - Final

*X-2230 N H.P.*

Effluent Characteristic Parameter	Concentration Specified Units			Discharge Limitations			Monitoring Requirements		
	Maximum Minimum	Weekly	Monthly	Daily	Weekly	Monthly	Measuring Frequency	Sampling Type	Monitoring Months
00400 - pH - S.U.	9.0	6.5	-	-	-	-	1/2 Weeks	Grab	All
00530 - Total Suspended Solids - mg/l	45	-	30	-	-	-	1/2 Weeks	Grab	All
00552 - Oil and Grease, Hexane Extr Method - mg/l	20	-	10	-	-	-	1/2 Weeks	Grab	All
39516 - PCBS - ug/l	-	-	-	-	-	-	1/Quarter	Grab	Quarterly
50050 - Flow Rate - MGD	-	-	-	-	-	-	1/Day	24hr Total Estimate	All
50060 - Chlorine, Total Residual - mg/l	-	-	-	-	-	-	1/2 Weeks	Grab	Summer

Notes for Station Number 01000000013:

- \* Discharges are limited to non-contact cooling water, storm runoff, groundwater infiltration, foundation drainage, and steam condensate, fire-fighting training and fire suppression system water, and sanitary water for eyewash/shower station testing and flushing.
- \*\* The effluent limitations for Total Suspended Solids shall not apply if the flow increases as a result of a precipitation or snow melt event and the three conditions listed below are met. Insert "AH" into the monthly monitoring report for Total Suspended Solids (Reporting Code 00530) and report the analytical result in the comments section. Conditions:
  - A. The discharge or increase in the volume of the discharge is caused by precipitation or snow melt.
  - B. The sampling for all parameters listed on this page are collected during the precipitation or snow melt event or within 48 hours after the precipitation or snow melt event has ceased.
  - C. The permittee documents that the discharge or increase in the discharge was caused by the precipitation or snow melt event, and that the samples of the discharge for all parameters were collected during or within 48 hours after the precipitation or snow melt event had ceased. (See Part II, Paragraph G for specific information which must be submitted as documentation).
- \*\*\* There shall be no detectable amount of polychlorinated biphenyls. The permittee shall use method 608 as indicated in 40 CFR 136, Appendix A.
- Sampling shall be performed when discharging. If NO DISCHARGE OCCURS DURING THE ENTIRE MONTH, report "AL" in the first column of the first day of the month on the 4500 Form (Monthly Operating Report). A signature is still required.

Part I, A. - FINAL EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

6. During the period beginning on the effective date of this permit and lasting until the expiration date, the permittee is authorized to discharge in accordance with the following limitations and monitoring requirements from outfall 0100000012. See Part II, OTHER REQUIREMENTS, for locations of effluent sampling.

Table - Final Outfall - 012 - Final

Effluent Characteristic Parameter	Discharge Limitations				Monitoring Requirements					
	Concentration Maximum	Specified Units Minimum	Weekly	Monthly	Daily	Loading* Weekly	kg/day Monthly	Measuring Frequency	Sampling Type	Monitoring Months
00400 - pH - S.U.	9.0	6.5	-	-	-	-	-	1/2 Weeks	Grab	All
00530 - Total Suspended Solids - mg/l	45	-	-	30	-	-	-	1/2 Weeks	Grab	All
00552 - Oil and Grease, Hexane Extr Method - mg/l	20	-	-	10	-	-	-	1/2 Weeks	Grab	All
00980 - Iron, Total Recoverable - ug/l	-	-	-	-	-	-	-	1/2 Weeks	Grab	All
39180 - Trichloroethylene - ug/l	-	-	-	-	-	-	-	1/2 Weeks	Grab	All
39516 - PCBS - ug/l	-	-	-	-	-	-	-	1/Quarter	Grab	Quarterly
50050 - Flow Rate - MGD	-	-	-	-	-	-	-	1/Day	24hr Total Estimate	All
50060 - Chlorine, Total Residual - mg/l	-	-	-	-	-	-	-	1/2 Weeks	Grab	Summer

Notes for Station Number 01000000012:

\* Discharges are limited to non-contact cooling water, storm runoff, groundwater infiltration, foundation drainage, and steam condensate, fire-fighting training and fire suppression system water, sanitary water for eyewash/shower station testing and flushing, and the discharge from the X-625 Treatment System, Outfall 010000000612.

\*\* The effluent limitations for Total Suspended Solids shall not apply if the flow increases as a result of a precipitation or snow melt event and the three conditions listed below are met. Insert "AH" into the monthly monitoring report for Total Suspended Solids (Reporting Code 00530) and report the analytical result in the comments section. Conditions:

- A. The discharge or increase in the volume of the discharge is caused by precipitation or snow melt.
- B. The sampling for all parameters listed on this page are collected during the precipitation or snow melt event or within 48 hours after the precipitation or snow melt event has ceased.
- C. The permittee documents that the discharge or increase in the discharge was caused by the precipitation or snow melt event, and that the samples of the discharge for all parameters were collected during or within 48 hours after the precipitation or snow melt event had ceased. (See Part II, Paragraph G for specific information which must be submitted as documentation).

\*\*\* There shall be no detectable amount of polychlorinated biphenyls. The permittee shall use method 608 as indicated in 40 CFR 136, Appendix A.

- Sampling shall be performed when discharging. IF NO DISCHARGE OCCURS DURING THE ENTIRE MONTH, report "AL" in the first column of the first day of the month on the 4500 Form (Monthly Operating Report). A signature is still required.

Part I, A. - FINAL EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

7. During the period beginning on the effective date of this permit and lasting until the expiration date, the permittee is authorized to discharge in accordance with the following limitations and monitoring requirements from outfall 01000000612. See Part II, OTHER REQUIREMENTS, for locations of effluent sampling.

Table - Internal Monitoring Station - 612 - Final

Effluent Characteristic	Discharge Limitations				Monitoring Requirements			
	Concentration Specified Units		Loading* kg/day		Measuring Frequency	Sampling Type	Monitoring Months	
	Maximum	Minimum	Weekly	Daily				Monthly
00400 - pH - S.U.	-	-	-	-	-	1/2 Weeks	Grab	All
00980 - Iron, Total Recoverable - ug/l	-	-	-	-	-	1/2 Weeks	Grab	All
39180 - Trichloroethylene - ug/l	10	-	-	10	-	1/2 Weeks	Grab	All
50050 - Flow Rate - MGD	-	-	-	-	-	1/Day	24hr Total Estimate	All

Notes for station 01000000612:

- Sampling shall be performed when discharging. If NO DISCHARGE OCCURS DURING THE ENTIRE MONTH, report "AL" in the first column of the first day of the month on the 4500 Form (Monthly Operating Report). A signature is still required.

Part I, A. - FINAL EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

8. During the period beginning on the effective date of this permit and lasting until the expiration date, the permittee is authorized to discharge in accordance with the following limitations and monitoring requirements from outfall 01000000610. See Part II, OTHER REQUIREMENTS, for locations of effluent sampling.

Table - Internal Monitoring Station - 610 - Final

Effluent Characteristic Parameter	Discharge Limitations				Monitoring Requirements		
	Concentration Specified Units	Loading* kg/day	Measuring Frequency	Sampling Type	Monitoring Months		
00400 - pH - S.U.	-	-	-	1/2 Weeks	Grab	All	
34546 - 1,2-trans-Dichloroethylene - ug/l	66	25	1/2 Weeks	Grab	All		
39180 - Trichloroethylene - ug/l	10	10	1/2 Weeks	Grab	All		
50050 - Flow Rate - MGD	-	-	1/Day	24hr Total	All		

Notes for station 01000000610:

Sampling shall be performed when discharging. IF NO DISCHARGE OCCURS DURING THE ENTIRE MONTH, report "AL" in the first column of the first day of the month on the 4500 Form (Monthly Operating Report). A signature is still required.

Part II, OTHER REQUIREMENTS

A. Description of the location of the required sampling stations are as follows:

Sampling Station	Description of Location
OIO00000012	(X-2230M Southwest Holding Pond) Samples are to be collected after discharge from the X-2230M Southwest Holding Pond and prior to discharge to the Piketon DOE Tributary of the Scioto River. (Lat: 38 N 59' 45"; Long: 83 W 00' 50")
OIO00000013	(X-2230N West Holding Pond) Samples are to be collected after discharge from the X-2230N West Holding Pond, and prior to discharge to West Ditch. (Lat: 39 N 00' 46"; Long: 83 W 00' 56")
OIO00000015	(X-624 Groundwater Treatment Facility) Samples are to be collected from the X-624 treatment system prior to discharge to an unnamed tributary of Little Beaver Creek. (Lat: 39 N 01' 15"; Long: 82 W 59' 15")
OIO00000608	(X-622 Groundwater Facility) Samples are to be collected from the X-622 treatment system prior to discharge to the X-6619 Sewage Treatment Facility which discharges to OIS00023003. (Lat: 39 N 00' 20"; Long: 82 W 59' 55")
OIO00000610	(X-623 Groundwater Treatment Facility) Samples are to be collected from the X-623 treatment system prior to discharge to the X-6619 Sewage Treatment Facility which discharges to OIS00023003. (Lat: 39 N 00' 42"; Long: 82 W 59' 32")
OIO00000611	(X-622T Groundwater Treatment Facility) Samples are to be collected from the X-622T treatment system prior to discharge to the X-6619 Sewage Treatment Facility which discharges to OIS00023003. (Lat: 39 N 00' 54"; Long: 82 W 59' 52")
OIO00000612	(X-625 Groundwater Treatment Facility) Samples are to be collected from the X-625 treatment system prior to discharge to the X-2230M Southwest Holding Pond which discharges to OIO00000012.
OIO00000613	(X-6002 Particulate Separator) Samples are to be collected from the particulate separator prior to the discharge to the X-6619 Sewage Treatment Facility which discharges to OIS00023003.

B. This permit shall be modified, or alternatively, revoked and reissued, to comply with any applicable effluent standard or limitation issued or approved under Sections 301(b)(2)(C) and (D), 304(b)(2), and 307(a)(2) of the Clean Water Act, if the effluent standard or limitation so issued or approved:

1. Contains different conditions or is otherwise more stringent than any effluent limitation in the permit; or
2. Controls any pollutant not limited in the permit.

The permit as modified or reissued under this paragraph shall also contain any other requirements of the Act then applicable.

C. All parameters, except flow, need not be monitored on days when the plant is not normally staffed (Saturdays, Sundays, and Holidays). On those days, report "AN" on the monthly report form. Flow need not to be reported on those days for Outfalls 0IO00000012 and 0IO00000013.

D. In the event that the permittee's operation requires the use of cooling or boiler water treatment additives that are discharged to surface waters of the state, written permission must be obtained from the director of the Ohio EPA prior to use. Reporting and testing requirements to apply for permission to use additives can be obtained from the Ohio EPA, Central Office, Division of Surface Water, Water Resources Management Section. Reported information will be used to evaluate whether the use of the additive(s) at concentrations expected in the final discharge will be harmful or inimical to aquatic life.

E. Permit limitations may be revised in order to meet water quality standards after a stream use determination and waste load allocation are completed and approved. This permit may be modified, or alternatively, revoked and reissued, to comply with any applicable water quality effluent limitations.

F. Grab samples shall be collected at such times and locations, and in such fashion, as to be representative of the facility's performance.

G. The following information must be submitted by the permittee as proof of qualification for the alternate effluent limitations at outfall 01000000012 and 01000000013.

1. The 10 year, 24-hour precipitation event (inches) for the area in which the discharge occurs.\*
2. The date, duration (time begin/ time end), and total 24-hour accumulation (inches) of the precipitation which caused the discharge or increase in volume of the discharge.
3. The date and time grab samples were collected.

\* As defined by the National Weather Service and technical paper No. 40, "Rainfall Frequency Atlas of the United States", May 1961, or equivalent regional rainfall probability information developed therefrom.

This information should be included in the "Additional Remarks" section of the monthly operating report or as an attachment.

H. Best Management Practices (BMP) Plan:

1. The permittee shall continue to implement the BMP plan and keep a copy of the plan at the facility and shall make the BMP Plan available to the Director upon request.
2. The permittee shall amend the BMP plan whenever there is a change in facility design, construction, operation, or maintenance which materially affects the facility's potential for discharge of significant amounts of unauthorized or hazardous or toxic pollutants into waters of the United States.
3. If the BMP Plan proves to be ineffective in achieving the general objective of preventing the release of significant amounts of unauthorized or hazardous or toxic pollutants to these waters, the permit and/or the BMP plan shall be subject to modification to incorporate revised BMP requirements.
4. The permittee shall develop and implement the appropriate procedures needed to minimize and/or eliminate the discharge of trichloroethylene from this facility.

I. Isotopic uranium (i.e., uranium - 233/234, uranium-236, and uranium-238), total uranium, transuranic isotopes (americium-241, neptunium-237, plutonium-239, plutonium 239/240), and technetium-99 should be sampled at the outfall location and at the frequency defined in the Environmental Monitoring Plan for the Portsmouth Gaseous Diffusion Plant. The Environmental Monitoring Plan defines and documents the requirements for environmental monitoring programs at the Portsmouth Gaseous Diffusion Plant as outlined in U. S. Department of Energy (DOE) Order 5400.1, General Environmental Protection Program and DOE Order 5400.5, Radiation Protection of the Public and the Environment.

Within sixty (60) days of the end of each calendar quarter (March, June, September and December), the results of the above radiological monitoring conducted during the previous quarter shall be summarized and should be submitted to Ohio EPA's Southeast District Office, Attention: "Division of Surface Water."

### PART III - GENERAL CONDITIONS

#### 1. DEFINITIONS

"Daily load" is the total discharge by weight during any calendar day. If only one sample is taken during a day, the weight of pollutant discharge calculated from it is the daily load.

"Daily concentration" means the arithmetic average of all the determinations of concentration made during the day. If only one sample is taken during the day, its concentration is the daily concentration. Coliform bacteria limitations compliance shall be determined using the geometric mean.

"Weekly load" is the total discharge by weight during any 7-day period divided by the number of days in that 7-day period that the facility was in operation. If only one sample is taken in a 7-day period, the weight of pollutant discharge calculated from it is the 7-day load. If more than one sample is taken during the 7-day period, the 7-day load is calculated by determining the daily load for each day sampled, totaling the daily loads for the 7-day period, and dividing by the number of days sampled.

"Weekly concentration" means the arithmetic average of all the determinations of daily concentration limitation made during the 7-day period. If only one sample is taken during the 7-day period, its concentration is the 7-day concentration for that 7-day period. Coliform bacteria limitations compliance shall be determined using the geometric mean.

"Monthly load" is the total discharge by weight during all days in a calendar month divided by the number of days that the facility was in operation during that month. If only one sample is taken during the month the weight of pollutant discharge calculated from it is the monthly load. If more than one sample is taken during the month, the monthly load is calculated by determining the daily load for each day sampled, totaling the daily loads for the month and dividing by the number of days sampled.

"Monthly concentration" means the arithmetic average of all the determinations of daily concentration made during any calendar month. If only one sample is taken during the month, its concentration is the monthly concentration for that period. Coliform bacteria limitations compliance shall be determined using the geometric mean.

"85 percent removal" means the arithmetic mean of the values for effluent samples collected in a period of 30 consecutive days shall not exceed 15 percent of the arithmetic mean of the values for influent samples collected at approximately the same times during the same period.

"Absolute Limitations" Compliance with limitations having descriptions of "shall not be less than," "nor greater than," "shall not exceed," "minimum," or "maximum" shall be determined from any single value for effluent samples and/or measurements collected.

"Net concentration" shall mean the difference between the concentration of a given substance in a sample taken of the discharge and the concentration of the same substances in a sample taken at the intake which supplies water to the given process. For the purpose of this definition, samples that are taken to determine the net concentration shall always be 24-hour composite samples made up of at least six increments taken at regular intervals throughout the plant day.

"Net load" shall mean the difference between the load of a given substance as calculated from a sample taken of the discharge and the load of the same substance in a sample taken at the intake which supplies water to given process. For purposes of this definition, samples that are taken to determine the net Loading shall always be 24-hour composite samples made up of at least six increments taken at regular intervals throughout the plant day.

"MGD" means million gallons per day.

"mg/l" means milligrams per liter.

"ug/l" means micrograms per liter.

"Reporting Code" is a five digit number used by the Ohio EPA in processing reported data. The reporting code does not imply the type of analysis used nor the sampling techniques employed.

"Quarterly (1/Quarter) sampling frequency" means the sampling shall be done in the months of March, June, August, and December, unless specifically identified otherwise in the Effluent Limitations and Monitoring Requirements table.

"Yearly (1/Year) sampling frequency" means the sampling shall be done in the month of September, unless specifically identified otherwise in the effluent limitations and monitoring requirements table.

"Semi-annual (2/Year) sampling frequency" means the sampling shall be done during the months of June and December, unless specifically identified otherwise.

"Winter" shall be considered to be the period from November 1 through April 30.

"Bypass" means the intentional diversion of waste streams from any portion of the treatment facility.

"Summer" shall be considered to be the period from May 1 through October 31.

"Severe property damage" means substantial physical damage to property, damage to the treatment facilities which would cause them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.

"Upset" means an exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

## 2. GENERAL EFFLUENT LIMITATIONS

The effluent shall, at all times, be free of substances:

- A. In amounts that will settle to form putrescent, or otherwise objectionable, sludge deposits; or that will adversely affect aquatic life or water fowl;
- B. Of an oily, greasy, or surface-active nature, and of other floating debris, in amounts that will form noticeable accumulations of scum, foam or sheen;
- C. In amounts that will alter the natural color or odor of the receiving water to such degree as to create a nuisance;
- D. In amounts that either singly or in combination with other substances are toxic to human, animal, or aquatic life;
- E. In amounts that are conducive to the growth of aquatic weeds or algae to the extent that such growths become inimical to more desirable forms of aquatic life, or create conditions that are unsightly, or constitute a nuisance in any other fashion;
- F. In amounts that will impair designated instream or downstream water uses.

## 3. FACILITY OPERATION AND QUALITY CONTROL

All wastewater treatment works shall be operated in a manner consistent with the following:

- A. At all times, the permittee shall maintain in good working order and operate as efficiently as possible all treatment or control facilities or systems installed or used by the permittee necessary to achieve compliance with the terms and conditions of this permit. Proper operation and maintenance also includes adequate laboratory controls and appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only when the operation is necessary to achieve compliance with conditions of the permit.
- B. The permittee shall effectively monitor the operation and efficiency of treatment and control facilities and the quantity and quality of the treated discharge.
- C. Maintenance of wastewater treatment works that results in degradation of effluent quality shall be scheduled during non-critical water quality periods and shall be carried out in a manner approved by Ohio EPA as specified in the Paragraph in the PART III entitled, "UNAUTHORIZED DISCHARGES".

## 4. REPORTING

- A. Monitoring data required by this permit may be submitted in hardcopy format on the Ohio EPA 4500 report form pre-printed by Ohio EPA or an approved facsimile. Ohio EPA 4500 report forms for each individual sampling station are to be received no later than the 15th day of the month following the month-of-interest. The original report form must be signed and mailed to:

Ohio Environmental Protection Agency  
Lazarus Government Center  
Division of Surface Water  
Enforcement Section ES/MOR  
P.O. Box 1049  
Columbus, Ohio 43216-0149

Monitoring data may also be submitted electronically using Ohio EPA developed SWIMware software. Data must be transmitted to Ohio EPA via electronic mail or the bulletin board system by the 20th day of the month following the month-of-interest. A Surface Water Information Management System (SWIMS) Memorandum of Agreement (MOA) must be signed by the responsible official and submitted to Ohio EPA to receive an authorized Personal Identification Number (PIN) prior to sending data electronically. A hardcopy of the Ohio EPA 4500 form must be generated via SWIMware, signed and maintained onsite for records retention purposes.

B. If the permittee monitors any pollutant at the location(s) designated herein more frequently than required by this permit, using approved analytical methods as specified below, the results of such monitoring shall be included in the calculation and reporting of the values required in the reports specified above.

C. Analyses of pollutants not required by this permit, except as noted in the preceding paragraph, shall not be reported on Ohio EPA report form (4500) but records shall be retained as specified in the paragraph entitled "RECORDS RETENTION".

#### 5. SAMPLING AND ANALYTICAL METHOD

Samples and measurements taken as required herein shall be representative of the volume and nature monitored flow. Test procedures for the analysis of pollutants shall conform to regulation 40 CFR 136, "Test Procedures For The Analysis of Pollutants" unless other test procedures have been specified in this permit. The permittee shall periodically calibrate and perform maintenance procedures on all monitoring and instrumentation at intervals to insure accuracy of measurements.

#### 6. RECORDING OF RESULTS

For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:

- A. The exact place and date of sampling; (time of sampling not required on EPA 4500)
- B. The person(s) who performed the sampling or measurements;
- C. The date the analyses were performed on those samples;
- D. The person(s) who performed the analyses;
- E. The analytical techniques or methods used; and
- F. The results of all analyses and measurements.

## 7. RECORDS RETENTION

The permittee shall retain all of the following records for the wastewater treatment works for a minimum of three years, including:

- A. All sampling and analytical records (including internal sampling data not reported);
- B. All original recordings for any continuous monitoring instrumentation;
- C. All instrumentation, calibration and maintenance records;
- D. All plant operation and maintenance records;
- E. All reports required by this permit; and
- F. Records of all data used to complete the application for this permit for a period of at least three years from the date of the sample, measurement, report, or application.

These periods will be extended during the course of any unresolved litigation, or when requested by the Regional Administrator or the Ohio EPA. The three year period for retention of records shall start from the date of sample, measurement, report, or application.

## 8. AVAILABILITY OF REPORTS

Except for data determined by the Ohio EPA to be entitled to confidential status, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the appropriate district offices of the Ohio EPA. Both the Clean Water Act and Section 6111.05 Ohio Revised Code state that effluent data and receiving water quality data shall not be considered confidential.

## 9. DUTY TO PROVIDE INFORMATION

The permittee shall furnish to the Director, within a reasonable time, any information which the Director may request to determine whether cause exists for modifying, revoking, and reissuing, or terminating the permit, or to determine compliance with this permit. The permittee shall also furnish to the Director, upon request, copies of records required to be kept by this permit.

## 10. RIGHT OF ENTRY

The permittee shall allow the Director or an authorized representative upon presentation of credentials and other documents as may be required by law to:

- A. Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit.
- B. Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit.
- C. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit.
- D. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act, any substances or parameters at any location.

**11. UNAUTHORIZED DISCHARGES**

**A. Bypassing or diverting of wastewater from the treatment works is prohibited unless:**

1. Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;
2. There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of downtime. This condition is not satisfied if adequate back up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and
3. The permittee submitted notices as required under paragraph D. of this section,

**B. If the permittee knows in advance of the need for a bypass, it shall submit prior notice, if possible at least ten days before the date of the bypass.**

**C. The Director may approve an unanticipated bypass after considering its adverse effects, if the Director determines that it has met the three conditions listed in paragraph 11.A. of this section.**

**D. The permittee shall submit notice of an unanticipated bypass as required in section 12. A.**

**E. The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded if that bypass is for essential maintenance to assure efficient operation.**

**12. NONCOMPLIANCE NOTIFICATION**

A. The permittee shall by telephone report any of the following within twenty-four (24) hours of discovery at (toll free) 1-800-282-9378:

1. Any noncompliance which may endanger health or the environment;
2. Any unanticipated bypass which exceeds any effluent limitation in the permit; or
3. Any upset which exceeds any effluent limitation in the permit.
4. Any violation of a maximum daily discharge limitation for any of the pollutants listed by the Director in the permit.

B. For the telephone reports required by Part 12.A., the following information must be included:

1. The times at which the discharge occurred, and was discovered;
2. The approximate amount and the characteristics of the discharge;
3. The stream(s) affected by the discharge;
4. The circumstances which created the discharge;
5. The names and telephone numbers of the persons who have knowledge of these circumstances;
6. What remedial steps are being taken; and
7. The names and telephone numbers of the persons responsible for such remedial steps.

C. These telephone reports shall be confirmed in writing within five days of the discharge and submitted to the appropriate Ohio EPA district office. The report shall include the following:

1. The limitation(s) which has been exceeded;
2. The extent of the exceedance(s);
3. The cause of the exceedance(s);
4. The period of the exceedance(s) including exact dates and times;
5. If uncorrected, the anticipated time the exceedance(s) is expected to continue, and
6. Steps being taken to reduce, eliminate, and/or prevent occurrence of the exceedance(s).

**D. Compliance Schedule Events:**

If the permittee is unable to meet any date for achieving an event, as specified in the schedule of compliance, the permittee shall submit a written report to the appropriate district office of the Ohio EPA within 14 days of becoming aware of such situation. The report shall include the following:

1. The compliance event which has been or will be violated;
2. The cause of the violation;
3. The remedial action being taken;
4. The probable date by which compliance will occur; and
5. The probability of complying with subsequent and final events as scheduled.

E. The permittee shall report all instances of noncompliance not reported under paragraphs A, B, or C of this section, at the time monitoring reports are submitted. The reports shall contain the information listed in paragraphs B and C of this section.

F. Where the permittee becomes aware that it failed to submit any relevant application or submitted incorrect information in a permit application or in any report to the director, it shall promptly submit such facts or information.

**13. RESERVED****14. DUTY TO MITIGATE**

The permittee shall take all reasonable steps to minimize or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

**15. AUTHORIZED DISCHARGES**

All discharges authorized herein shall be consistent with the terms and conditions of this permit. The discharge of any pollutant identified in this permit more frequently than, or at a level in excess of, that authorized by this permit shall constitute a violation of the terms and conditions of this permit. Such violations may result in the imposition of civil and/or criminal penalties as provided for in Section 309 of the Act and Ohio Revised Code Sections 6111.09 and 6111.99.

**16. DISCHARGE CHANGES**

The following changes must be reported to the appropriate Ohio EPA district office as soon as practicable:

A. For all treatment works, any significant change in character of the discharge which the permittee knows or has reason to believe has occurred or will occur which would constitute cause for modification or revocation and reissuance. The permittee shall give advance notice to the Director of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements. Notification of permit changes or anticipated noncompliance does not stay any permit condition.

B. For publicly owned treatment works:

1. Any proposed plant modification, addition, and/or expansion that will change the capacity or efficiency of the plant;
2. The addition of any new significant industrial discharge; and
3. Changes in the quantity or quality of the wastes from existing tributary industrial discharges which will result in significant new or increased discharges of pollutants.

C. For non-publicly owned treatment works any proposed facility expansions, production increases, or process modifications, which will result in new, different, or increased discharges of pollutants.

Following this notice, modifications to the permit may be made to reflect any necessary changes in permit conditions, including any necessary effluent limitations for any pollutants not identified and limited herein. A determination will also be made as to whether a National Environmental Policy Act (NEPA) review will be required. Sections 6111.44 and 6111.45, Ohio Revised Code, require that plans for treatment works or improvements to such works be approved by the Director of the Ohio EPA prior to initiation of construction.

D. In addition to the reporting requirements under 40 CFR 122.41(l) and per 40 CFR 122.42(a), all existing manufacturing, commercial mining, and silvicultural dischargers must notify the Director as soon as they know or have reason to believe:

1. That any activity has occurred or will occur which would result in the discharge on a routine or frequent basis of any toxic pollutant which is not limited in the permit. If that discharge will exceed the highest of the "notification levels" specified in 40 CFR Sections 122.42(a)(1)(i) through 122.42(a)(1)(iv).
2. That any activity has occurred or will occur which would result in any discharge, on a non-routine or infrequent basis, of a toxic pollutant which is not limited in the permit, if that discharge will exceed the highest of the "notification levels" specified in 122.42(a)(2)(i) through 122.42(a)(2)(iv).

#### 17. TOXIC POLLUTANTS

The permittee shall comply with effluent standards or prohibitions established under Section 307 (a) of the Clean Water Act for toxic pollutants within the time provided in the regulations that establish these standards or prohibitions, even if the permit has not yet been modified to incorporate the requirement. Following establishment of such standards or prohibitions, the Director shall modify this permit and so notify the permittee.

#### 18. PERMIT MODIFICATION OR REVOCATION

A. After notice and opportunity for a hearing, this permit may be modified or revoked, by the Ohio EPA, in whole or in part during its term for cause including, but not limited to, the following:

1. Violation of any terms or conditions of this permit;
2. Obtaining this permit by misrepresentation or failure to disclose fully all relevant facts; or
3. Change in any condition that requires either a temporary or permanent reduction or elimination of the permitted discharge.

B. Pursuant to rule 3745-33-04, Ohio Administrative Code, the permittee may at any time apply to the Ohio EPA for modification of any part of this permit. The filing of a request by the permittee for a permit modification or revocation does not stay any permit condition. The application for modification should be received by the appropriate Ohio EPA district office at least ninety days before the date on which it is desired that the modification become effective. The application shall be made only on forms approved by the Ohio EPA.

### 19. TRANSFER OF OWNERSHIP OR CONTROL

This permit may be transferred or assigned and a new owner or successor can be authorized to discharge from this facility, provided the following requirements are met:

A. The permittee shall notify the succeeding owner or successor of the existence of this permit by a letter, a copy of which shall be forwarded to the appropriate Ohio EPA district office. The copy of that letter will serve as the permittee's notice to the Director of the proposed transfer. The copy of that letter shall be received by the appropriate Ohio EPA district office sixty (60) days prior to the proposed date of transfer;

B. A written agreement containing a specific date for transfer of permit responsibility and coverage between the current and new permittee (including acknowledgement that the existing permittee is liable for violations up to that date, and that the new permittee is liable for violations from that date on) shall be submitted to the appropriate Ohio EPA district office within sixty days after receipt by the district office of the copy of the letter from the permittee to the succeeding owner;

At anytime during the sixty (60) day period between notification of the proposed transfer and the effective date of the transfer, the Director may prevent the transfer if he concludes that such transfer will jeopardize compliance with the terms and conditions of the permit. If the Director does not prevent transfer, he will modify the permit to reflect the new owner.

### 20. OIL AND HAZARDOUS SUBSTANCE LIABILITY

Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under Section 311 of the Clean Water Act.

### 21. SOLIDS DISPOSAL

Collected screenings, slurries, sludges, and other solids shall be disposed of in such a manner as to prevent entry of those wastes into waters of the state. For publicly owned treatment works, these shall be disposed of in accordance with the approved Ohio EPA Sludge Management Plan.

### 22. CONSTRUCTION AFFECTING NAVIGABLE WATERS

This permit does not authorize or approve the construction of any onshore or offshore physical structures or facilities or the undertaking of any work in any navigable waters.

### 23. CIVIL AND CRIMINAL LIABILITY

Except as exempted in the permit conditions on UNAUTHORIZED DISCHARGES or UPSETS, nothing in this permit shall be construed to relieve the permittee from civil or criminal penalties for noncompliance.

### 24. STATE LAWS AND REGULATIONS

Nothing in this permit shall be construed to preclude the institution of any legal action nor relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any applicable state law or regulation under authority preserved by Section 510 of the Clean Water Act.

### 25. PROPERTY RIGHTS

The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.

## 26. UPSET

The provisions of 40 CFR Section 122.41(n), relating to "Upset," are specifically incorporated herein by reference in their entirety. For definition of "upset," see Part III, Paragraph 1, DEFINITIONS.

## 27. SEVERABILITY

The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.

## 28. SIGNATORY REQUIREMENTS

All applications submitted to the Director shall be signed and certified in accordance with the requirements of 40 CFR 122.22.

All reports submitted to the Director shall be signed and certified in accordance with the requirements of 40 CFR Section 122.22.

## 29. OTHER INFORMATION

A. Where the permittee becomes aware that it failed to submit any relevant facts in a permit application or submitted incorrect information in a permit application or in any report to the Director, it shall promptly submit such facts or information.

B. ORC 6111.99 provides that any person who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under this permit shall, upon conviction, be punished by a fine of not more than \$25,000 per violation.

C. ORC 6111.99 states that any person who knowingly makes any false statement, representation, or certification in any record or other document submitted or required to be maintained under this permit including monitoring reports or reports of compliance or noncompliance shall, upon conviction, be punished by a fine of not more than \$25,000 per violation.

D. ORC 6111.99 provides that any person who violates Sections 6111.04, 6111.042, 6111.05, or division (A) of Section 6111.07 of the Revised Code shall be fined not more than \$25,000 or imprisoned not more than one year, or both.

## 30. NEED TO HALT OR REDUCE ACTIVITY

40 CFR 122.41(c) states that it shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with conditions of this permit.

## 31. APPLICABLE FEDERAL RULES

All references to 40 CFR in this permit mean the version of 40 CFR which is effective as of the effective date of this permit.

## 32. AVAILABILITY OF PUBLIC SEWERS

Notwithstanding the issuance or non-issuance of an NPDES permit to a semi-public disposal system, whenever the sewage system of a publicly owned treatment works becomes available and accessible, the permittee operating any semi-public disposal system shall abandon the semi-public disposal system and connect it into the publicly owned treatment works.
